Profile

Web Developer with 2+ years and 45+ delivered websites across WordPress, Shopify, Webflow, Framer, and hardcoded builds. Owns projects end-to-end — from client brief to deployment — with deep expertise in responsive design, GSAP animations, and custom Shopify development. Consistent on-time delivery and client-praised UI across e-commerce, brand, and lead generation projects.

Professional Experience

August 2024 – present
Techinfinity, Mumbai

Jr. Web Developer

- Delivered **45+ client websites** across 5 platforms (WordPress, Shopify, Webflow, Framer, and custom HTML/CSS) within a 2-year period, managing full project cycles from client brief to live deployment.
- Engineered **responsive, production-ready builds** for 40+ clients with consistent on-time or ahead-of-schedule delivery across static, dynamic, and e-commerce projects.
- Built **25+ custom front-end components** including GSAP scroll-triggered animations, AJAX based filtering, Shopify product templates, and interactive mega menus directly addressing client business requirements across e-commerce, lead generation, and brand campaigns.
- Delivered **UI implementations** consistently praised by clients for visual quality and interaction design, with multiple clients requesting the same design approach across subsequent projects.
- Managed **10+ website migrations** with zero data loss, reducing average deployment downtime from 2 hours to under 40 minutes through structured deployment planning and pre-launch testing protocols.
- Retained repeat **project engagements** from clients due to consistent delivery quality, UI standards, and reliable communication.

May 2024 – August 2024
Techinfinity, Mumbai

Web Developer Intern

- Independently owned **8+ website projects** end-to-end from requirement gathering and responsive layout development to CMS integration, cross-device testing, and final deployment coordinating directly with designers and project stakeholders.
- Implemented **custom features** including lead capture forms, product carousels, schema markup for SEO, and location finder map sections, improving website functionality and search engine visibility for client sites.
